- ✓ Full Stack Development (BE / Web3 / AI / FE)
- ✓ Infrastructure / DevOps / Cloud
- ✓ love to build & learn new things

WORK EXPERIENCE

N F N FUNGIBLE CODE

Founder / Full Stack Developer – B2B proxy since 2020

Helping clients build their ideas by developing & hosting custom software solutions. I've worked with clients of all sizes – startups to enterprises – across various industries, technologies, and countries.

I usually do backend, infrastructure and frontend. I especially enjoy building AI-powered tools, blockchain-based systems, cloud-native software, and anything else that pushes the limits of what's possible.

Teach Me Code

Full Stack Developer / Backend Lead | Oct 2024 – June 2025

Contributed to multiple projects; one of them is **biela.dev**, where I led the Backend team.

- **Full Stack Development:** Developed microservices, client apps, and software solutions for any challenge.
- **DevOps:** Architected, built, and automated infrastructure across multiple projects.
- **Backend Lead:** Drove backend strategy, architecture, and implementation for diverse projects; collaborated closely with teams, managed tasks and responsibilities, and worked with all members to deliver the best solutions possible.

Back End Developer | May 2023 – Sep 2024 · 1y 4m

Saved years of manual work for dozens of clients, by designing and developing automation solutions, utilizing web scraping/crawling, AI, and security techniques, including CAPTCHA and security bypass methods.

MultiversX

Back End Developer | May 2022 – Mar 2023 · ~1y

Contributed to MultiversX (prev Elrond Network) products used by millions of users.

- <https://xExchange.com> (DEX);
- <https://xSpotlight.com> (NFT Marketplace);
- few other contributions to other open source repositories.

Agile

toluna

Back End Developer | Aug 2021 – May 2022 · ~1y

Helped Toluna with managing all the internal tools by myself, by developing new features, fixing bugs and managing migrations (from on-premise to cloud) for all the internal tools.

VISMA

System Administrator & Developer | Jul 2018 – Aug 2021 · 3y 2m

Helped internal developer teams with cloud resources tasks, and the IT department with automation tools & dashboards.

- System administered Windows Server, MSSQL, cloud resources and IT tools;
- On-call shifts, support and assistance for internal development teams with cloud resources;
- Developed & maintained different internal tools & integrations.

Software Developer | Mar 2017 – Jun 2018 · 1y 4m

Contributed to WAG automatic suspension software, trained new colleagues and saved hundreds of hours by automating the testing process.

- Designed, developed & tested embedded complex drivers for the Automotive industry using the Autosar architecture;
- Trained new colleagues during their first months;
- Developed internal automation tools.

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate

Microsoft Certified: Azure Fundamentals

Database Design and Programming with SQL

IT Information Library Foundations Certification (ITIL)

EDUCATION

University of Lucian Blaga, Sibiu

Bachelor, Computer Science | 2016–2020

Gheorghe Lazar National College, Sibiu

High School, [Mathematics & Informatics](#) | 2012–2016

the end – thank you!
